Profile

I'm an iOS developer with 3+ years of expertise building mobile apps, working among a big team of talented developers to create some sports apps at Pulselive, a Sony company. Previous apps were written in Objective-C, since 2017 I'm also a Swift enthusiast.

My dream job would allow me to combine my technical skills with my passion for design in order to create high quality software with a great user experience. I would enjoy working in an environment where teamwork matters and I can be inspired by all people I work with. In a company ready for new challenges where you can always keep learning.
